OUR COMPANY

MRT was established in 1987 - now fast forward 34 years. MRT evolved into a highly specialized boutique recruiting firm, with a forward-facing emphasis in the manufacturing space of polymer processing. MRT is unique, as we are technically savvy in the areas of tooling, processes, production, and operations. We vertically integrate with our clients, then move laterally, helping to recruit critical roles. Our clients call on us to help them not only in sourcing for top executives but also middle management (technical or operations), engineering, and sales.

The MRT team has over 85 years of recruiting experience. We know manufacturing, people, and how to make the proper connections to solve the client's needs. With 15 members on our team, we have the right people in place to successfully manage the entire recruiting process, from sourcing to placement. MRT has helped hundreds of companies and thousands of job searchers by maintaining our core values of integrity and quality.

MRT is a member of MRINetwork, which spans 300 recruiting offices on five continents. Having this connection, our team has continuous access to the best training and resources available, allowing us to continue adapting to the changing demands of the recruiting world and industries we serve.
